

# **QACS** LAB

## **Environmental monitoring Services**

- Verify aseptic areas within operating specifications
- Ensure sterility level for the handling of finished products
- Comply with international pharmaceutical standards
- Use of Microbial & Molecular data

**EU GMP  
Annex 1  
compliance**

QACS  
**Environmental  
Monitoring**

**Risk assessment  
Studies**

**Limits & acceptance levels  
Determination**

**Performance Qualification  
Protocol**

**Environmental sampling**

Settle plates, Volumetric air, Surface sampling

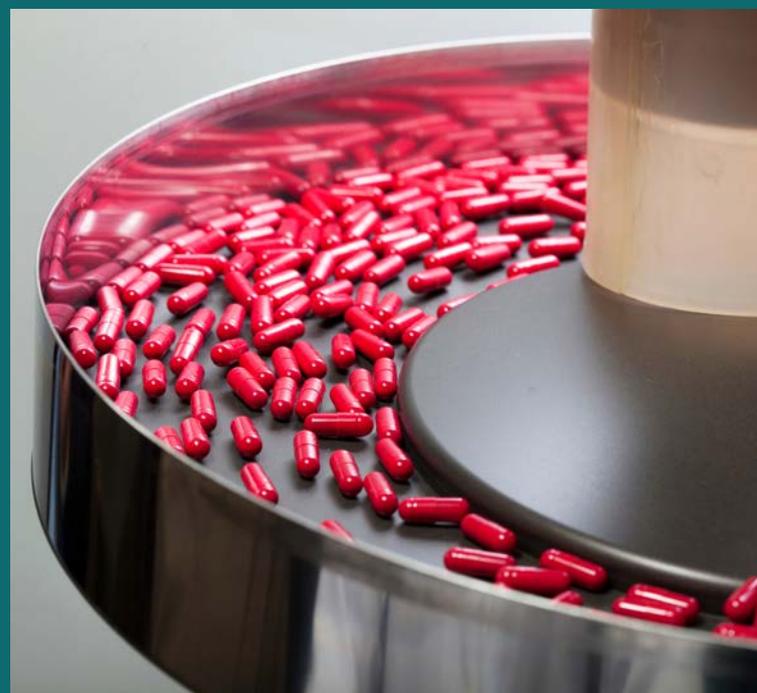

**Viable & non-viable** monitoring of production facilities/utilities

**Quantitative & Qualitative** findings

Monitoring Implementation

**EU GMP Annex 1  
Compliance**

Documented reports

**QACS applies PCR and DNA sequencing technologies to provide highly accurate microbial identification, as requested by Annex 1**

Assessing the status of your production environment, will allow you to optimise work flow and confirm contamination-free production processes.

**We provide customized monitoring programs and Full service of on-site environmental monitoring**
