

Skin Microbiome Analysis

QACS's Skin Microbiome clinical trials substantiate product microbiome claims. Customized protocols studies for **Microbiome Friendly** & **Microbiome Balance** are adopted to product's needs and budget.

Microbiome Friendly

Reveals information about the product's effect towards the skin microbiome. Competent **in vitro** studies are offered in rapid turnaround times to prove that the skin microbiome is not altered significantly by the product during use.

Skin Microbiome Analysis

Microbiome Balance

Indicates the alterations cosmetics have on the skin microbiome. Balance studies substantiate **retaining** or **restoring** natural balance claims.

- **Premium:** Panel of Volunteers, microbiological and physiological analyses, Next Generation Sequencing (NGS) analysis
- **Basic:** Panel of Volunteers, microbiological and physiological analyses
- **Standard:** same as Basic including species identification at selected bacterial colonies

Packages	Basic	Standard	Premium
Panel of volunteers	X	X	X
Microbiological & Physiological	X	X	X
Microbiological Identification		X	
Next Generation Sequencing			X
