

PFAS Testing

Packaging & Packaging Waste Regulation | PPWR

#QACSLAB

Laboratory Testing & Compliance solutions

PFAS, known as forever chemicals, are substances of increasing concern due to their persistence and potential impact on human health.

At QACS Lab, we provide advanced PFAS testing solutions for packaging contact materials, ensuring safety, compliance, and consumer confidence.

Regulatory Compliance

In accordance with Regulation (EU) 2025/40 on packaging and packaging waste, QACS Lab performs PFAS determination analyses in packaging materials, supporting compliance with current and emerging European legislation.

Our PFAS & Packaging Compliance Testing Solutions

- Targeted analysis of PFAS in packaging materials
- Identification & quantification of PFAS compounds in compliance with EU regulatory requirements
- Total fluorine (TF) analysis per PPWR requirements
- Total organic fluorine (TOF) analysis
- Heavy metals analysis according to EU limits
- Compliance with EU regulations

Advanced PFAS Testing for Food Contact & Packaging Materials

QACS Lab provides high-level analytical solutions for the detection, identification, and assessment of PFAS in packaging materials, supporting industry compliance with evolving European regulatory frameworks.
